Acknowledgements

We thank and acknowledge the following sources:

The description of finger-holding (page 21) is adapted from the *CAPACITAR Emergency Response Tool Kit*, Patricia Mathes Cane (2005). While the concepts of “speak the unspeakable” and “protective shield,” are part of child-parent psychotherapy, the related activities in this book (pages 36 and 39) were developed by Maria Seymour St. John, with inspiration from *Don't hit my mommy!: A manual for child-parent psychotherapy with young witnesses of family violence*, Lieberman, Alicia F., and Patricia Van Horn, Zero to Three (2005). “How to communicate with a person experiencing psychosis” (page 57) was developed by Maria Seymour St. John with information from Psychosis: First aid guidelines (mhfainternational.org/guidelines), Mental Health First Aid Australia (MHFA), Melbourne (2019) and *Implementing Early Intervention in Psychosis*, Edwards, J & McGorry, PD., Martin Dunitz, London (2002). “Chart your digital loop” (page 115) is adapted by Hesperian from materials kindly shared by My Digital TAT2. The activity “Find stress-busters” (page 151) is adapted from Chapter 12: Stress Management and Self Care by Joani Marinoff, from *Training Guide to Foundations for Community Health Workers*, Tim Berthold (ed.), Community Health Worker Certificate Program, City College of San Francisco (October 2015), and other useful ideas are provided in its accompanying textbook, *Foundations for Community Health Workers*.
